Preserving the Power of Scotch Cap Genetics

Fellow Cattlemen,

Welcome to the Jindra Angus 12th Annual Production Sale. I would like to thank everyone for taking time to give our program consideration. As another year has gone by, I am grateful for you as our friends, customers and fellow cattlemen. It is with your success in mind that we strive to create a great product.

At Jindra Angus we have stayed the course and continue to produce the same venue of high performance cattle. Our herd is influenced by genetics from many great Angus programs, but our gene pool grows most heartily from Scotch Cap genetics. The commitment to these genetics is consistent over time, and far more intricate than following fads or using popular sires.

This year's offering features again a powerful set of Salt Creek Bob sons and an exciting group of Premium Cut calving ease bulls. The first calf heifers from both of these sires are really shining as new producers this spring. The Connealy Impression sire group is also powerful, and another solid set of Tender Taste sons deserve mentioning as well. We are also offering a good set of heifers that have the tools to become great mother cows.

I hope you enjoy the offering and I would be glad to visit with you anytime. There is a variation through the herd that is home to your demands. Just let me know if I can help guide you through the sale cattle, or if you have any questions at all.

Thanks on behalf of everyone at Jindra Angus,

Nick 402-920-3171

*A special thanks to everyone who helped
with the preparation for this sale!*

GENERAL SALE INFORMATION

HEALTH PROGRAM

All cattle have been preconditioned and vaccinated again at weaning time with IBR, BVD, BRSV, PI3, 7 way and pasteurella. They were poured and dewormed in the fall and again in February. The bulls have been semen evaluated and vaccinated with Vibrio Lepto. The heifers were bangs vaccinated and have also been vaccinated with Vibrio Lepto.

Scrotal measurements printed are the actual measurements that were taken in January.

FIRST BREEDING SEASON GUARANTEE

Bulls are guaranteed against breeding injury for the first breeding season which is defined as the 90-day period following the first turnout of the bulls. In the event that an injury occurs please notify the seller as soon as possible to coordinate appropriate action.

LUNCH

Complimentary lunch will be served at the sale barn café.

RETAINED INTEREST AND SALE ORDER

Jindra Angus will retain 1/3 semen revenue sharing interest in all of the bulls in this sale. The buyer has full possession and salvage value of the bull at the end of his useful life. Any further semen interests or flushing rights will be announced sale day. All announcements take precedence over printed material in this catalog. Sale order will be made Tuesday morning.

TRUCKING DISCOUNT

\$50 discount if you haul your bull home sale day.

SALE LOCATION

Creighton Livestock Market • PO Box 155 • 1103 Peabody Ave.
Creighton, NE 68729 • 402-358-3449

SIGHT-UNSEEN SATISFACTION GUARANTEE

Buyers unable to attend the sale may contact any of the listed references for help in placing their bids. Bids may be taken on the phone during the sale if enough phone lines are available, but that cannot be guaranteed. All bids left are held in confidentiality and purchases are guaranteed to meet your expectations.

VIEWING THE SALE AND BIDDING ONLINE

The sale order will also be online this year and a newer format will help make bidding online faster and more user friendly than in previous years.

View the sale live online by visiting www.cattleusa.com and clicking on the Creighton Livestock Market link. You must register prior to the sale and please allow time for your registration to be processed. Special registration information is required to bid online.

LIABILITY

Jindra Angus does not assume any liability in case of accident.

OWNERSHIP

Cattle are the property of the buyer as soon as sold. Terms are cash. Cattle will be kept free of charge until April 1.

COMMENTS FROM THE SALE MANAGER

JINDRA ANGUS GENETICS - MORE VALUABLE THAN EVER BEFORE

As the beef industry and quality Angus cattle in particular enjoy the record strongest market in history, the value produced from Jindra Angus Genetics has increased exponentially. Rich in the best of Hoff Scotch Cap genetics, developed for added growth and performance, the Jindra program carries forward the genetic potency to consistently add more pounds, gain ability and profit than ever before. A constant that continues to remain in the beef industry, regardless of the price level, is that cattle are sold by the pound. The reality is that cattlemen who are able to sell more product at weaning and yearling time make more money and with the strong current market demand and even brighter outlook, the price spread is even greater than ever.

Nick Jindra has diligently carried forward the best of the elite Hoff Scotch Cap genetics. Unlike any other herd in the world today, the true Hoff Scotch Cap genetics are found here in the same full concentration as they were in Bison, South Dakota, where commercial and registered cattlemen from around the globe would annually pilgrimage to the site where they bought the best genetics that they could afford. With years gone by since the final Hoff Scotch Cap Dispersal, it is rare to find the degree of full blood Hoff Scotch Cap breeding that has been preserved in the Jindra breeding program.

Nick Jindra has a clear reflection of these high-performance genetics in his program. In 2011 Nick exhibited the heaviest pen of spring yearling bulls of the entire 2011 National Western Stock Show. In 2012 Nick exhibited two other very popular pens at the National Western Stock Show that were once again met with popular acclaim from leading registered and commercial cattlemen.

If your program does not already include Jindra bulls, it is not too late to get started in capturing the benefits of future premiums, and if you have been an ongoing Jindra customer you already know the advantages of stacking generations of Jindra genetics. Nick Jindra knows and understands the beef industry as few others do with a first hand involvement in the production of breeding stock, a commercial herd and the feedlot segment. You can be assured that your individual goals and concerns are clearly identified with him.

It is a pleasure and privilege to work with Nick Jindra and his family in the presentation of this powerful offering of Angus bulls and heifers. Please feel free to call on us if we can be of assistance in any way. We are here to serve.

Sincerely,

Tom Burke
Kurt Schaff

- Salt Creek Bob has another exciting set of progeny in this year's calf crop. His sons are thick and powerful with good fleshing ability. They are soggy, high performance cattle with added bone and substance. Our first daughters look very good as easy keeping, good milking, well mannered mothers.

- Dam: BW 8@95, WW 8@105, IMF 20@105. Take a look at this 'No Holes' knockout from an own daughter of Scotch Cap! As a donor her sons were headline sale features in our 2007 sale. These rare genetics are even scarcer after we lost Tabulation's dam late summer to lightning. She will be sorely missed. These rare and dynamic genetics need to be well utilized in a registered program.

- Uncharted is an Off Limits son that we reached back to sample at Doug's recommendation. He was a standout in the 2004 calf crop at Scotch Cap where he was noted as the "thickest" Off Limits son in my catalog. He is backed by growth and maternal genetics on both sides lining up Stockman 365 and Miss Renovation 856. Calves are well received and exhibit appealing growth and depth of muscle.

• Premium Cut was a top Tender Taste son from a good pathfinder cow in the 2008 calf crop with excellent genetic test ratings. His calves are very low birth weight and grow really well. Premium Cut is standing out as a dynamic sire that the breed can really use right now. Use his sons on those smaller cows and heifers to make room for pounds.

- Blockbuster is an extraordinary Scotch Cap sire that instills more muscle mass and capacity in his calves than any other sire we've used here. His daughters are treasured females with exceptional maternal quality. Semen is limited on the deceased sire, so progeny here are primarily the result of ET.

- Label is a calving ease sire from the Princess Eileen donor dam with another group of very consistent sons in this year's sale. He is a very correct, big footed bull with a fantastic disposition. His stylish progeny are easy fleshing with extra hair and will grow into heavy bone and mass. Use his sons on heifers or cows.
